VI. PROJECT DEFINITION

A. BACKGROUND

Located at the Northern end of Wharton State Forest is the Atsion Recreation Area, a popular destination for visitors looking to picnic, swim, play and explore. Throughout Wharton are rivers and streams for canoeing, hiking trails (including a major section of the Batona Trail), miles of unpaved roads for mountain biking and horseback riding and numerous lakes, ponds and fields ideal for bird and wildlife observation.

Wharton State Forest is the largest single tract of land within the New Jersey State Park System. It is also the site of Batsto Village, a former bog iron and glassmaking industrial center from 1766 to 1867 that currently reflects the agricultural and commercial enterprises that existed here during the late 19th century. The property is the home of the Atsion Mansion built in 1826 for a prominent ironmaster and purchased eventually by Joseph Wharton whom used the mansion for for packing and storage for his cranberry production. The state acquired the property in 1955.

PROJECT LOCATION: Wharton State Forest, Burlington County

All cabins are ADA accessible and include screened porches, fireplaces, outdoor campfire rings, hot and cold running water, electricity, and bathrooms with toilets and showers. Construction has been recently completed for replacing the Individual Subsurface Sewage Disposal Systems (ISSDS) at each of the cabins along Atsion Lake. (See Exhibit 'C' Photos). The cabins have aged and weathered and fixtures and have exceeded their lifetime use.

Wharton State Forest is open to the public year round and the cabins are used as overnight facilities from April through October. Both cabins are currently unoccupied. There are dedicated roadways to access each of the sites.

Responsible Group Code Table

The codes below are used in the schedule field "GRP" that identifies the group responsible for the activity. The table consists of groups in the Division of Property Management & Construction (DPMC), as well as groups outside of the DPMC that have responsibility for specific activities on a project that could delay the project if not completed in the time specified. For reporting purposes, the groups within the DPMC have been defined to the supervisory level of management (i.e., third level of management, the level below the Associate Director) to identify the "functional group" responsible for the activity.
