# PUBLIC EMPLOYEES' RETIREMENT SYSTEM <br> OF NEW JERSEY <br> FORTY-SEVENTH ANNUAL REPORT <br> OF THE ACTUARY <br> PREPARED AS OF JULY 1, 2001 

February 8, 2002
Board of Trustees
Public Employees’ Retirement System
of New Jersey
Trenton, New Jersey
Members of the Board:
Enclosed please find a report summarizing the results of the forty-seventh annual valuation of the assets and liabilities of the Public Employees’ Retirement System of New Jersey. The valuation represents the eightieth annual valuation of retirement benefits provided by the State and other public employers in New Jersey if the valuations made under the provisions of the State Employees’ Retirement System of New Jersey, which was superseded by the present system, are included. The valuation shows the financial condition of the System as of July 1, 2001 and gives the basis for determining the appropriation payable by the employers for the fiscal year beginning July 1, 2002.

The valuation was prepared on the basis of the revised actuarial assumptions that were developed on the basis of the three year experience investigation for the period ended March 31, 1999 which was approved by the Board of Trustees at the October 18, 2000 Board meeting and the revised funding policy set forth in Chapter 41, P.L. 1992 and Chapter 62, P.L. 1994. The funding policy includes the use of the projected unit credit funding method for pension benefits and a salary scale which averages 5.95 percent. An interest rate of $83 / 4$ percent was used in determining the liabilities of the System in accordance with the directive of the State Treasurer issued in 1992 under the terms of Chapter 41, P.L. 1992. In addition, the valuation reflects the provision of Chapter 115, P.L. 1997 of the Pension Security Proposal Legislation. This legislation permitted the State to pay off the unfunded accrued liabilities from the proceeds of pension obligation bonds. Finally, the report also incorporates the provisions of Chapter 133, P.L. 2001, which provided for an increase in pension allowances payable from the System for active members, existing retirees and beneficiaries, reduced the age requirement and increased the benefits payable to certain veteran members, prescribed the use of market value as actuarial value of assets for the June 30, 1999 valuation and established the Benefit Enhancement Fund to fund the cost of the benefit improvements.

The Table of Contents, which follows, highlights the Sections of the Report.

REPORT ON THE FORTY-SEVENTH<br>VALUATION OF THE PUBLIC EMPLOYEES' RETIREMENT SYSTEM OF NEW JERSEY<br>PREPARED AS OF JULY 1, 2001

## SECTION I—SUMMARY OF KEY RESULTS

The Public Employees’ Retirement System of New Jersey, which began operation January 2, 1955, was established under Chapter 84 of the Laws of 1954. It supersedes the State Employees’ Retirement System of New Jersey which began operating as of January 1, 1922. This report, prepared as of July 1, 2001, presents the results of the forty-seventh actuarial valuation of the System.

For convenience of reference, the principal results of the valuation and a comparison with the preceding year's results are summarized on the following pages.

## * Excludes inactive members.

** Includes receivable contribution of $\$ 86,693,289$ for 2001 and $\$ 84,052,293$ for 2000 and excludes assets held in the Contributory Group Insurance Premium Fund of $\$ 141,449,901$ for 2001 and $\$ 124,156,531$ for 2000. In addition, the valuation assets shown for 2000 were determined prior to the retroactive effect of Chapter 133, P.L. 2001 which is first reflected in the July 1, 2001 results.
*** Required contributions are currently covered by assets held in the Benefit Enhancement Fund.
\# Rate varies by location on account of ERI.
\#\# Contributions will be the amount necessary to pay the current year's anticipated post-retirement medical premiums plus a $1 / 2 \%$ of compensation additional contribution.
\#\#\# ERI costs are included with the basic allowance costs.

\# ERI costs are included with the basic allowance costs.
\#\# Contributions were calculated assuming payment on 7/1/2002 and 7/1/2001, respectively; interest should be added from those dates to the actual payment date.

* Required contributions have been reduced by a portion of excess valuation assets (See Section III).
** Required contributions are currently covered by assets held in the Benefit Enhancement Fund.
***There is no required unfunded liability payment since a net surplus exists.
${ }^{\varnothing}$ ERI costs for Local Employers consist of $\$ 974,113$ in principal and $\$ 16,012,920$ in interest for 2001 and $\$ 153,668$ in principal and $\$ 16,020,866$ in interest for 2000 . The contributions also include the additional cost due to Chapter 59, P.L. 1999 for West Deptford Township.

The major benefit and contribution provisions of the statute as reflected in the valuation are summarized in Appendix A. The valuation also reflects the provisions of Chapter 133, P.L. 2001 which provides for the following changes:

- Increased the retirement benefits payable on account of service, deferred and early retirement by changing the accrual formula from $1 / 60$ to $1 / 55$ of final compensation for each year of Class B service (and from $1 / 70$ to $1 / 64$ for Class A Service). The law also increased the retirement benefit of veteran members with 35 or more years of service from $1 / 60$ to $1 / 55$ of compensation received in the last year of employment for each year of creditable service and reduced the age requirement for the benefit from 60 to 55 . The law also provided for a $9.09 \%$ increase in retirement allowances for existing retirees, beneficiaries and veterans with 35 or more years of service.
- To fund the additional accrued liability for the increased benefits, the law provided that the actuarial value of assets for the valuation period ending June 30, 1999 be the full market value of the assets as of that date. Beginning with the revised June 30, 2000 valuation, the five-year average of market value with mark-up was again used.

Although this change has no material effect on the actuarial valuations as of June 30, 1999 and June 30, 2000, which were completed prior to this legislation, it did change the amount of valuation assets used for these valuations. The original amounts used for each valuation and the revised amounts reflecting the effect of Chapter 133, can be summarized as follows:

| Actuarial Value of Assets | State |  | Local |  | Total System |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| June 30, 1999 Valuation |  |  |  |  |  |  |
| Original | \$ | 9,091,293,607 | \$ | 13,171,311,650 | \$ | 22,262,605,257 |
| Revised | \$ | 10,455,840,897 | \$ | 15,370,597,029 | \$ | 25,826,437,926 |
| June 30, 2000 Valuation |  |  |  |  |  |  |
| Original | \$ | 9,932,222,595 | \$ | 14,380,511,913 | \$ | 24,312,734,508 |
| Revised | \$ | 11,119,378,737 | \$ | 16,293,890,193 | \$ | 27,413,268,930 |

- To fund the additional annual employer normal contribution for the increase in benefits, the law established the Benefit Enhancement Fund (BEF). The BEF will be funded by excess valuation assets beginning with the valuation period ending June 30, 1999. The amount of excess assets credited to the BEF cannot exceed the amount of member contributions for the fiscal year in which the additional normal contributions are payable. The BEF is limited to the present value of expected additional normal contributions for the increased benefits over the expected working lives of the active members for the valuation period. No additional excess valuation assets will be credited to the BEF after the maximum amount is attained. If the assets in the BEF are insufficient to cover the normal contribution for the increased benefits for a valuation period, the State will pay the amount of the normal contribution for the both the State and local employers not covered by assets from the BEF.

The development of the Benefit Enhancement Fund as of June 30, 2001, prior to any amount credited to the Fund as a result of this valuation, is as follows:

## State Local Employers

a) Available Excess Valuation Assets credited to BEF as of the June 30, 1999 valuation (equal to Fiscal Year 2001 Member contributions)
\$ 90,024,979 \$ 149,721,622
b) Available Excess Valuation Assets credited to BEF as of the June 30, 2000 valuation (equal to Fiscal Year 2002 estimated Member contributions)
\$ 92,957,508
\$ 143,604,931
c) BEF prior to the June 30, 2001 valuation $=[(a)$ * $\left.(1.0875)^{2}+(\mathrm{b}) *(1.0875)\right]$
\$207,559,894 \$ 333,239,575

There were no other changes to the plan provisions since the previous valuation.

A summary of the actuarial assumptions and methods employed in the valuation is set forth in Appendix B. As discussed above, the June 30, 1999 valuation assets were redetermined to be the full market value of assets. Beginning with the June 30, 2000 valuation, the five-year average of market value with mark-up was continued. There were no other changes in actuarial assumptions and methods used since the previous valuation.

The combination of the plan provisions, actuarial assumptions and member and beneficiary data is used to generate the overall required level of employer contributions. These contributions are composed of two separate portions-an "accrued liability contribution" and a "normal contribution". The contributions payable are discussed in detail in Section V.

The valuation also generates a balance sheet which summarizes in some detail the total present and prospective assets and liabilities of the System. Table III of Section VI presents the detailed balance sheet as of July 1, 2001. The remainder of Section VI of this report analyzes the balance sheet.

A summary comparison of the balance sheets as of July 1, 2001 and July 1, 2000 is set forth in the following table. The allocation of assets among the various investment alternatives is shown in graphic form on page 9.

Chapter 133, P.L. 2001 revalued the actuarial value of plan assets to market retroactive to the June 30, 1999 valuation (beginning with the June 30, 2000 valuation, the five-year-average of market value with write-up was again used). The following summary shows the development of the actuarial value of plan assets for the current valuation:

## E. Development of Excess Valuation Assets

Chapter 115, P.L. 1997 prescribes a procedure for determining the value of excess valuation assets. This law provided for a reduction in the normal contributions of the State or other employers for the valuation periods ended March 31, 1996 and March 31, 1997 to the extent possible by the excess valuation assets and permitted the State Treasurer to reduce the normal contribution payable by the State or other employers for valuations after March 31, 1997 up to a specified portion of excess valuation assets. It also provided for a reduction, for calendar years 1998 through 2001, of the contributions by employees of the State and Local employers by $2 \%$ from excess valuation assets. Chapter 133, P.L. 2001 further specified that if there are excess valuation assets available after reduction for the normal contributions payable by the State or other employers and for contributions by employees of the State and other employers, then an amount of excess assets not to exceed the amount of member contributions shall be credited to the benefit enhancement fund. The development of excess valuation assets as of June 30, 2001 is developed below:

|  | Valuation Assets | State |  | Local Employers |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## SECTION IV-COMMENTS CONCERNING THE VALUATION

The variation in liabilities and contributions reflects the System's actual experience during the year. The increase in the actuarial surplus is the net result of an increase in the surplus due to Chapter 133, P.L. 2001 and a decrease in the surplus on account of the investment return which was less than that expected $(7.89 \%$ on an actuarial value of asset basis, rather than the $8.75 \%$ expected).

## State

The following table outlines the effect of the various items of actuarial experience on the increase in the normal contribution rate for basic allowances and active COLA from 3.46\% to 4.68\% (prior to recognition of Excess Assets).

| - | Loss on account of new members | + | $.04 \%$ |
| :--- | :--- | :--- | :--- |
| - | + | .01 |  |
| - | Pay increases greater than expected | +.03 |  |
| - Phase-in of active COLA | + | .37 |  |
| - - Loss on account of active experience | +.71 |  |  |
| - Loss on account of Chapter 133, P.L. 2001* | +.06 |  |  |
| - Other experience | $+1.22 \%$ |  |  |

*In accordance with Chapter 133, P.L. 2001, this amount is currently covered by assets in the Benefit Enhancement Fund.

The number of active members increased by about $3.4 \%$ between valuations while gross compensation used for contribution purposes increased by about $6.3 \%$ and average compensation increased by about $2.8 \%$ (from \$41,362 to \$42,516).

The number of pensioners and beneficiaries receiving benefits and the amount of benefits payable increased between the two valuations. The average benefit payable increased (from about $\$ 1,024$ per month to about $\$ 1,073$ per month). The increase reflects both the higher benefits payable to new retirees and the deaths of older pensioners with lower benefits but does not reflect the $9.09 \%$ increase in retirement allowance due to Chapter 133, P.L. 2001 which is effective after the valuation date. Cost-of-living increases after retirement are reflected in both amounts.

Included in Table II, which provides a summary of the contributions payable, are payments representing anticipated State post-retirement medical benefit premiums for the current year's benefits plus an amount that will ensure an increase in the Post Retirement Medical Fund of $1 / 2$ of $1 \%$ of the salary of active members for the valuation period.

## Local Employers

The following table outlines the effect of the various items of actuarial experience on the increase in the normal contribution rate for basic allowances and active COLA from 2.96\% to 4.38\%.

| - Loss on account of new members | + .03\% |
| :---: | :---: |
| - Pay increases greater than expected | + . 07 |
| - Phase-in of active COLA | + . 05 |
| - Loss on account of active experience | + . 55 |
| - Loss on account of Chapter 133, P.L. 2001* | + . 66 |
| - Other experience | + . 06 |
| - Total | 1.42\% |

*In accordance with Chapter 133, P.L. 2001, this amount is currently covered by assets in the Benefit Enhancement Fund.

The number of active members increased by about $3.5 \%$ between valuations. Gross compensation increased by about $6.7 \%$, while average compensation increased by about $3.1 \%$ (from about $\$ 29,515$ per year to $\$ 30,443)$.

The total number of pensioners and beneficiaries receiving benefits and the amount of benefits payable increased between the two valuations. The average benefit payable also increased (from about $\$ 687$ per month to about $\$ 719$ per month). The increase reflects both the higher benefits payable to new retirees and the deaths of older pensioners with smaller benefits but does not reflect the $9.09 \%$ increase in retirement allowance due to Chapter 133, P.L. 2001 which is effective after the valuation date. Cost-of-living increases after retirement are reflected in both amounts.

## SECTION V-CONTRIBUTIONS PAYABLE BY THE STATE AND LOCAL EMPLOYERS

The employers are required to make two contributions, a normal contribution and an accrued liability contribution (if applicable). The normal contribution for basic allowances and retiree COLAs is defined under the Projected Unit Credit funding method as the present value of the benefits accruing during the current year. The unfunded accrued liability (surplus) for basic allowances and retiree COLAs is determined as the difference between the accrued liability and the actuarial value of assets on hand. If there was no unfunded accrued liability for the State for the valuation period immediately preceding the current valuation period, the current year's accrued liability contribution is determined as a level percentage of pay required to liquidate the unfunded accrued liability in annual payouts increasing at a specific rate and paid annually for a specific time (which shall not exceed 30 years) as determined by the State Treasurer. Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years will increase or decrease the amortization period for the unfunded accrued liability (unless an increase will cause it to exceed 30 years). For Local Employers, the initial accrued liability contribution rates were determined with the March 31, 1992 valuation as a level percentage of pay required to liquidate the unfunded accrued liability in increasing annual payouts over a period of 40 years. Any actuarial gains or losses for the 10 valuation years following the March 31, 1992 valuation will increase or decrease the unfunded accrued liability contribution (thereafter, actuarial gains or losses will increase or decrease the amortization period unless an increase will cause it to exceed 30 years).

The employers are also required to make contributions for active employees towards the payment of cost-ofliving adjustments after retirement. Similar to the funding for basic allowances and retiree COLAs, the normal contribution for active COLAs was determined as the present value of the benefits accruing during the current year. The initial accrued liability contribution rates were determined for the March 31, 1992 valuation as a level percentage of pay required to liquidate the unfunded accrued liability in annual payments increasing at the rate of $6 \%$ per year over a period of 40 years. Experience gains or losses are
recognized in future accrued liability contributions. COLA benefits are fully funded as of July 1, 2001 for both the State and Local Employers.

The portion of the contribution for providing post-retirement medical costs for State employees has been determined separately. This portion is made up of three pieces, an amount necessary to pay anticipated premiums for the current year's benefits less the expected return on Post Retirement Medical Fund assets, plus an amount that will ensure an increase in the fund equal to $1 / 2$ of $1 \%$ of the salary of active State employee members for the current valuation period.

The current year's contribution to the Post Retirement Medical Fund is summarized as follows:
Anticipated current year's premium
\$ 100,764,778
Expected asset return
$1 / 2 \%$ of active member salary for State employees
Post-retirement medical contribution
\$ 102,493,007

On the basis of the normal rates applicable to State employees and the current year's payroll, the contributions for the fiscal year beginning July 1, 2002 payable by the State and the agencies which pay the same normal rates as the State are shown in Table II.

Based on Table II, the total contribution payable by the State to the Contingent Reserve Fund is $\$ 0$ for the year beginning July 1, 2002, and the total contribution payable by the State to the Non-Contributory Group Insurance Premium Fund is also \$0. In addition, the current year's contribution to the Post Retirement Medical Account has been determined to be $\$ 102,493,007$.

** There is no required accrued liability contribution since a net surplus exists.

## SECTION VI - VALUATION BALANCE SHEET

The valuation balance sheet showing the assets and liabilities of the System as of July 1, 2001 is presented on the following Table III. The amounts of the present assets credited to the various funds were furnished by the Division of Pensions and Benefits, State of New Jersey.

The valuation was prepared on the basis of the results of the experience study for the period from April 1, 1996 to March 31, 1999. In determining the liabilities of the Contingent Reserve Fund and Retirement Reserve Fund, an interest rate of $83 / 4 \%$ was used in accordance with the directive of the State Treasurer issued in 1992. In determining the assets credited to the Benefit Enhancement Fund, an interest rate of $83 / 4 \%$ was also used in accordance with Chapter 133, P.L. 2001.

[^1]The valuation balance sheet indicates the following facts regarding the various funds.
(1) Retirement Reserve Fund

When a member retires, or when he dies and an allowance is payable to his beneficiary, the allowance including cost-of-living adjustments is paid from this fund. The member's own contributions with interest are transferred from the Annuity Savings Fund and the balance of the reserve on the total allowance is transferred from the Contingent Reserve Fund. On the valuation date, the Retirement Reserve Fund has present assets of $\$ 9,247,794,308$. The liabilities of the fund amount to $\$ 10,042,083,233$ so that there is a deficit of $\$ 794,288,925$ in the fund on the valuation date. It is recommended that the fund be put in balance as of June 30, 2001 by a transfer of assets from the Contingent Reserve Fund equal to $\$ 794,288,925$ and this transfer is shown in the balance sheet.
(2) Special Reserve Fund

The Special Reserve Fund is the fund to which any excess earnings are transferred and against which any losses from the sale of securities are charged. The maximum limit on the accumulations in this fund is set at one percent of the market value of the investments of the retirement system; any amounts in excess of this limit are creditable to the Contingent Reserve Fund. Due to the investment losses, this fund has assets amounting to $\$ 0$ as of June 30, 2001. The Special Reserve Fund is considered as an asset of the retirement system.
(3) Annuity Savings Fund and Contingent Reserve Fund

The Annuity Savings Fund, which is the fund to which members' contributions with interest are credited, has assets amounting to $\$ 5,745,676,090$ as of June 30 , 2001. The Contingent Reserve Fund is the fund to which contributions made by employers to provide the benefits paid from retirement system monies are credited. Payments for the group insurance made by The Prudential Insurance Company of America to provide the non-contributory cash death benefits are deducted from the Contingent Reserve Fund. The assets creditable to the Contingent Reserve Fund amount to $\$ 11,420,548,329$ as of June 30, 2001 after adjustment is made on account of the amount transferable to the Retirement Reserve Fund and the Benefit Enhancement Fund.

If a member withdraws from active service before qualifying for retirement, the amount of his accumulated deductions is paid to him from the Annuity Savings Fund. If he dies before retirement and no survivorship benefit is payable, his accumulated deductions are paid to his beneficiary from the Annuity Savings Fund. If he retires, or if he dies leaving a beneficiary eligible for a survivorship benefit, his accumulated deductions are transferred from the Annuity Savings Fund to the Retirement Reserve Fund, and the reserve on the allowance which is not provided by his own deductions is transferred from the Contingent Reserve Fund to the Retirement Reserve Fund. Any lump sum benefit payable upon the death of a member before or after retirement is paid by The Prudential Insurance Company of America.
(4) Post-Retirement Medical Fund

This fund is established to hold contributions in respect of future post-retirement medical premiums. The fund has assets of $\$ 254,252,724$ as of June 30, 2001. These assets have been included as retirement system assets. Accordingly, offsetting liabilities equal to these fund balances have also been included.

## (5) Benefit Enhancement Fund

Chapter 133, P.L. 2001 established the Benefit Enhancement Fund to fund the additional annual normal contribution for the increase in benefits under this law. The Benefit Enhancement Fund is funded by excess valuation assets transferable from the Contingent Reserve Fund. The amount of excess valuation assets transferable to the fund is limited to the amount of member contributions for the fiscal year in which the additional normal contributions are payable. The fund balance is limited to the present value of expected additional normal contributions for the increased benefits over the expected working lives of the active members for the valuation period. No additional excess valuation assets will be transferred to the fund after the maximum amount is attained. The assets creditable to the Benefit Enhancement Fund from the Contingent Reserve Fund is $\$ 540,799,469$ as of June 30, 2001.

The assets are included as retirement system assets.

The June 30, 2001 valuation balance sheet shows on the liabilities side that the prospective benefits for which reserves are being accumulated in the Annuity Savings Fund and the Contingent Reserve Fund have a present value of $\$ 13,663,418,626$ including $\$ 2,130,255,326$ for prospective cost-of-living adjustments. To meet the benefit payments, the System has present assets of \$17,166,224,419 consisting of \$5,745,676,090 in the Annuity Savings Fund and $\$ 11,420,548,329$ in the Contingent Reserve Fund. If this amount is subtracted from $\$ 13,663,418,626$, the present value of prospective benefits, there exists a surplus of $\$ 3,502,805,793$. When the assets in the Special Reserve Fund amounting to $\$ 0$ are added to this amount, the surplus remains $\$ 3,502,805,793$. In addition, please note that, in accordance with Chapter 133, P.L. 2001, $\$ 540,799,469$ has been accumulated in the Benefit Enhancement Fund to fund the additional annual employer normal contributions attributable to this legislation. Adding this amount to the surplus of $\$ 3,502,805,793$ yields a net surplus of $\$ 4,043,605,262$.

In accordance with the provisions of Chapter 385, P.L. 1987, Chapter 41, P.L. 1992 and Chapter 62, P.L. 1994, the contributions of the employers to the Contingent Reserve Fund consist of two annual contributions, a normal contribution and an accrued liability contribution. The normal contribution is the present value of the benefits accruing during the current year. The initial accrued liability amortization
periods were set at 40 years commencing with the March 31, 1992 valuation with payments assumed to increase 6\% per year. The contributions for active member COLA adjustments are being phased in.

On these bases, the following future contribution rates, prior to any adjustments, are required to meet the employers' obligations:

| ITEM | RATE |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | State |  | Local |  |
|  | Normal | Accrued Liability | Normal | Accrued Liability |

| Total | 5.59\% | 0.00\% | 5.20\% | 0.00\% |

*Actual contribution will depend on the payment schedule chosen by each location.

In accordance with the provisions of Chapter 6, P.L. 1990, contributions to fund the cost-of-living adjustments for current actives were to be phased in beginning with the March 31, 1988 valuation. Further, in accordance with the provisions of Chapter 41, P.L. 1992, amended by the provisions of Chapter 8, P.L. 1993 and Chapter 62, P.L. 1994, the phase-in for the funding of these benefits was further adjusted. The current valuation reflects a $41.92 \%$ phase-in of the active COLA benefits. In addition, the valuation reflects the revised assumptions that were developed on the basis of the three year experience investigation for the period ended March 31, 1999.

Pursuant to Chapter 114, the Pension Obligation Bond proceeds paid to the System fully funded the State unfunded accrued liability and present value of the projected cost payments in excess of the projected phased-in normal cost contribution for active COLAs.

Chapter 115, P.L. 1997 provided for a reduction in the normal contributions of the State or other employers for the valuation periods ended March 31, 1996 and March 31, 1997 to the extent possible by the excess valuation assets and permitted the State Treasurer to reduce the normal contribution payable by the State or by the other employers for valuations after March 31, 1997 up to a specified portion of excess valuation assets (See Section III(F)). The net effect of this legislation was to reduce the required contributions for Fiscal Year 2003 to the post-retirement medical premium payment (State) and the ERI contributions (Local employers).

Finally, Chapter 133, P.L. 2001 provided for the establishment of the Benefit Enhancement Fund from which any additional normal cost due to the increase in benefits under this legislation would be paid. If assets in this fund are insufficient to cover the normal contribution for the increased benefits for a valuation period, the State will pay the amount of the normal contribution not covered by the fund for both the State and Local employers not covered by the fund.

The actual contribution rates determined in the valuation are as follows:

| ITEM |  | RATE |  |  |  |

## SECTION VII-EXPERIENCE

Records are maintained with regard to developing mortality, service and compensation experience of members and beneficiaries of the System as compared to the anticipated experience based on the current assumptions that were developed on the basis of the three year experience investigation for the period ended March 31, 1999. In accordance with the provisions of Section 19 of Chapter 84 of the Laws of 1954, as amended and supplemented, once in every three-year period significant deviations are noted and revised assumptions are recommended so that the funding requirements of the System can be properly anticipated.

## SECTION VIII-ACCOUNTING INFORMATION

Statement No. 5 of the Governmental Accounting Standards Board, issued November 1986, established standards of disclosure of pension information by public retirement systems. Statement No. 25 of the Governmental Accounting Standards Board, issued November 1994, established financial reporting standards for defined benefit pension plans and for the notes to the financial statements of defined contribution plans of state and local governmental liabilities and superseded Statement No. 5 effective for periods beginning after June 15, 1996. Statement No. 27, Accounting for Pensions by State and Local Governmental Employers superseded Statement 5 for employers participating in pension plans and is effective for periods beginning after June 15, 1997.

The information required by Statements No. 25 and No. 27 is presented in the following tables. These include the development of the Annual Required Contribution (ARC), the Schedule of Funding Progress and the Schedule of Employer Contributions.

## SECTION IX-LEVEL OF FUNDING

Although the value of accrued benefits and the funding ratios shown in the previous section are required for the State's financial statements, it is instructive to also look at these values under an alternative approach.

For this purpose, we are presenting liabilities determined on a Financial Accounting Standards Board Statement No. 87 Accumulated Benefit Obligation (ABO) basis. This is the same approach as GASB Statement No. 5 except that no assumption is made as to future salary increases.

## Local Employers

Actuarial present value of accumulated benefits:

*Includes $\$ 334,293,587$ in accumulated employee contributions with interest for employees with less than 10 years of service.
**Includes $\$ 348,155,766$ in accumulated employee contributions with interest for employees with less than 10 years of service.

As in the case of the Governmental Accounting Standard Board Statement No. 5, the actuarial present value of vested and non-vested accrued benefits was based on an interest rate of $8.75 \%$ for both 2000 and 2001 .

The amounts shown include liabilities for future cost-of-living adjustments and post-retirement medical premiums for eligible future and current retired members.

Eligible at age 55 after 20 years of service. Benefit equals a member annuity plus an employer pension which, together, equal $2 \%$ of final contributory compensation for each of the first 25 years of service plus $1 \%$ of such compensation for noncontributory service or service over 25 years plus $1-2 / 3 \%$ for nonlaw enforcement service.

After completion of 25 years of service, an additional retirement benefit equal to $5 \%$ of final contributory pay is added to the above service related retirement benefit. There is a maximum total benefit of 70\% of final contributory pay.

Eligible after 5 years of service. Benefit is the same as for regular members.

Eligible upon death after an accidental disability retirement. Benefit is the same as for a regular member with a $\$ 5,000$ minimum.

## Legislators

Service Retirement

Eligible at age 60 and termination of all public service. Benefit is equal to a member annuity plus an employer pension which,
together, equal $3 \%$ of final contributory compensation for each year of service to a maximum of $2 / 3$ of final compensation.

Vested Retirement
Eligible after 8 years of legislative service. Benefit is a service retirement benefit deferred to age 60 or, alternatively, a lump sum equal to his accumulated deductions.

## 3. Contributions

By Members

By Employers

Normal Contribution

Members enrolling in the retirement system on or after July 1, 1994 will contribute $5 \%$ of compensation. Members enrolled prior to July 1, 1994 will contribute $5 \%$ of compensation to the retirement system effective July 1, 1995 unless they previously had contributed less than $6 \%$ in which case they will contribute $4 \%$ of compensation beginning July 1, 1995 and $5 \%$ of compensation beginning July 1, 1996.

The State and Local employers pay annually a normal contribution to the retirement System. This contribution is determined each year on the basis of the annual valuation and represents the value of the benefits to be earned in the year following the valuation date. The normal contributions for active members' COLA are being phased in.

In accordance with the provisions of Chapter 79, P.L. 1960, which provided that the monies appropriated for payment of the noncontributory life insurance coverage shall be held separate from the retirement System monies, the amount required to pay such benefit is deducted from the normal contribution certified for payment to the retirement System and paid to a Group Insurance Premium Fund, which is administered by the State Treasurer.

In accordance with the provisions of Chapter 133, P.L. 2001, the Benefit Enhancement Fund (BEF) was established to fund the additional annual employer normal contribution due to the law's increased benefits. If the assets in the BEF are insufficient to cover the normal contribution for the increased benefits for a valuation period, the State will pay such amount for both the State and local employers.

Accrued Liability
Contributions
The State and Local employers pay contributions to cover any unfunded accrued liability. An unfunded accrued liability was established for active life COLAs. The amortization periods for funding these liabilities were set initially at 40 years. The accrued liability contributions for active members' COLA liabilities are being phased in. Experience gains or losses for the 10 valuation years following the March 31, 1992 valuation will increase or decrease the unfunded accrued liability. Thereafter, actuarial gains or losses will increase or decrease the amortization period unless an increase will cause it to exceed 30 years.

** A separate rate is used for accidental death.
*** A separate rate is used for accidental disability.

DEATHS AFTER RETIREMENT: 1979 George B. Buck Mortality Tables for service retirement and dependent beneficiaries. Special mortality tables are used for the period after disability retirement. Representative values of the assumed annual rates of mortality are as follows:

|  | Service Retirements |  |  |  | Disability Retirements |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Age | Men | Women | Age |  | Men | Women |

| 85 | 12.50 | 7.84 | 65 | 6.04 | 3.63 |  |

VALUATION METHOD: Projected Unit Credit Method. This method essentially funds the System’s benefits accrued to the valuation date. Experience gains or losses are recognized in future accrued liability contributions.

COLA: Benefits are assumed to increase $2.4 \%$ each year.
EXPENSES: Payable from excess investment return through employer contributions.
ASSET VALUATION METHOD: A five year average of market values with write-up was used. This method takes into account appreciation (depreciation) in investments in order to smooth asset values by averaging the excess of the actual over the expected income, on a market value basis, over a five year period. (In accordance with Chapter 133, P.L. 2001, the June 30, 1999 asset valuation method was changed to redetermine the actuarial value of assets to be the full market value. Beginning with the June 30, 2000 valuation, the five-year average of market value with mark-up was continued.)

## APPENDIX C

## TABULATIONS USED AS A BASIS FOR THE 2001 VALUATION

Table 1 gives a reconciliation of data from June 30, 2000 to June 30, 2001. Table 2 presents fifth year age and service tables for State and Local active members as well as for the entire system. Appendix C also contains tables that show the distribution of active members' and salaries by age and length of service as of June 30, 2001. Tables are also included that show the number and retirement allowances of beneficiaries classified by age as of June 30, 2001.
