Board of Trustees
The State Police Retirement System
of New Jersey
Trenton, New Jersey 08625

Members of the Board:

The law governing the operation of The State Police Retirement System of New Jersey provides for annual actuarial valuations of the System. The results of the July 1, 2001 valuation are submitted in this report which also includes a comparison with the preceding year's valuation.

The valuation shows the financial condition of the Plan as of July 1, 2001 and gives the basis for determining the required annual contribution for the plan year beginning July 1, 2001.

The valuation was prepared on the basis of the same assumptions as were employed for the previous valuation which include an interest rate of $8.75 \%$ per year.

The Table of Contents, which follows, highlights the Sections of the Report.
Respectfully submitted,

The major benefit and contribution provisions of the statute as reflected in the valuation are summarized in Appendix A. There were no changes from the provisions used in the previous valuation.

The actuarial assumptions and methods used for valuing the Fund are summarized in Appendix B. There were no changes in actuarial assumptions and methods since the previous valuation.

The combination of the plan provisions, actuarial assumptions and member and beneficiary data is used to generate the overall required level of employer contributions. These contributions are composed of two separate portions, an "accrued liability contribution" and a "normal contribution". The required contribution is developed in Section III G.

The valuation generates a balance sheet which summarizes in some detail the total present and prospective assets and liabilities of the Fund. A summary comparison of the balance sheets as of July 1, 2000 and July 1, 2001 is set forth in the following table. The allocation of assets among the various investment alternatives is shown in graphic form on page 5 .

## C. Development of Actuarial Value of Assets as of July 1, 2001

Chapter 115 P.L. 1997 revalued the actuarial value of plan assets to market for the July 1, 1996 valuation. Beginning with the July 1, 1997 valuation, the five-year average market value with write up was used. The following summary shows the development of the actuarial value of plan assets for the current valuation:

1. Actuarial Value of Assets as of July 1, 2000

## E. Development of Excess Valuation Assets

Chapter 115, P.L. 1997 prescribes a procedure for determining the value of excess valuation assets. This law provides for a reduction in the normal contributions for the valuation periods ending June 30, 1996 and June 30, 1997 to the extent possible by the excess valuation assets and permitted the State Treasurer to reduce the normal contribution payable by the State for valuations after June 30, 1997 up to a specified portion of excess valuation assets. The development of excess valuation assets is developed below:

1. Valuation Assets
2. Actuarial Accrued Liability
3. Excess Valuation Assets $=1 .-2$.

## SECTION IV - COMMENTS CONCERNING THE VALUATION

The variation in liabilities and contributions reflects the System's actual experience during the year. The System experienced a net actuarial loss during the year that ended June 30, 2001.

The loss is primarily due to an actual return on Fund assets less than that expected. For valuation purposes, an $8.75 \%$ per annum rate of return was assumed. The actual return on the Fund's actuarial value of assets was approximately $7.77 \%$ for the period from July 1, 2000 through June 30, 2001. There was also a net loss due to experience among the active and the retired participants.

The following shows the development of the actuarial experience and identifies the major experience components:

## SECTION VI - LEVEL OF FUNDING

Although the value of accrued benefits and the funding ratios shown in the previous section are required for the State's financial statements, it is instructive to also look at these values under an alternative approach. For this purpose, we are presenting liabilities determined on a Financial Accounting Standards Board Statement No. 87 Accumulated Benefit Obligation (ABO) basis. This is the same approach as GASB Statement No. 25 except that no assumption is made as to future salary increases.

| FASB 87 ABO Funded Ratios <br> Actuarial present value of accumulated benefits: | June 30, 2001 |  | June 30, 2000 |  |

| Ratio of Assets to Total Present Value |  | 109.9\% |  | 134.5\% |

As in the case of the Governmental Accounting Standard Board Statement No. 25, the actuarial present value of vested and non-vested accrued benefits was based on an interest rate of $8.75 \%$ for both 2000 and 2001 .

## APPENDIX A <br> BRIEF SUMMARY OF THE BENEFIT AND CONTRIBUTION PROVISIONS AS INTERPRETED FOR VALUATION PURPOSES

## Eligibility for Membership

All members of the former State Police and Benevolent Fund: full-time commissioned officers, noncommissioned officers or troopers of the Division of State Police. Membership is a condition of employment.

Plan Year

Credited Service

Compensation

Final Compensation

Aggregate Contributions

The 12-month period beginning on July 1 and ending on June 30.
Service rendered while a member as described above.
A year is credited for each year of service as an officer or trooper in the State Police. Service with other State Retirement Systems is included in the calculation of the retirement benefit at the rate of $1 \%$ of final compensation for each year of service credit.

Based on contractual salary, including maintenance allowance, received by the member in the last 12 months of credited service preceding retirement, termination or death. Compensation does not include individual salary adjustments granted primarily in anticipation of the retirement or for temporary or extracurricular duties beyond the ordinary work day. (Effective June 30, 1996, Chapter 113, P.L. 1997 provided that the amount of compensation used for employer and member contributions and benefits under the program cannot exceed the compensation limitation of Section 401(a)(17) of the Internal Revenue Code.)

Average compensation received by member in last 12 months of credited service preceding retirement or death. Such term includes the value of the member's maintenance allowance for the same period.

MARRIAGE: Husbands are assumed to be 3 years older than wives. Among the active population, 83.3\% of participants are assumed married. No children are assumed. Neither the percentage married or number of children assumptions are individually explicit but they are considered as a single combined assumption.

VALUATION METHOD: Projected Unit Credit Method. This method essentially funds the System's benefits accrued to the valuation date. Experience gains and losses are recognized in future accrued liability contributions.

ASSET VALUATION METHOD: A five year average of market values with write-up. (This method takes into account appreciation (depreciation) in investments in order to smooth asset values by averaging the excess of the actual over the expected income, on a market value basis, over a five year period).

HEALTH INSURANCE BENEFITS: Retiree Health Insurance benefits are funded by the State on a pay-as-you-go basis and are not included in the actuarial valuation.

DEATHS AFTER RETIREMENT: For Healthy Inactive Mortality the 1983 Group Annuity Mortality Table for males and females is used. Illustrative rates of mortality for retired members are shown below:
