Board of Trustees
The State Police Retirement System
of New Jersey
Trenton, New Jersey 08625
Members of the Board:
The law governing the operation of the State Police Retirement System of New Jersey provides for annual actuarial valuations of the System. The results of the July 1, 2009 valuation are submitted in this report, which also includes a comparison with the preceding year's valuation.

The valuation shows the financial condition of the Plan as of July 1, 2009 and gives the basis for determining the recommended annual contribution for the plan year beginning July 1, 2009.

The valuation was prepared on the basis of the revised demographic assumptions that were determined from the July 1, 2005 - June 30, 2008 Experience Study and approved by the Board of Trustees at the May 2009 Board meeting.

The valuation reflects the final provisions of the Appropriation Act for fiscal year 2009. (The fiscal year 2009 recommended pension contribution of $\$ 75,889,699$ has been reduced to $\$ 3,378,000$.) The valuation also reflects the potential effect of the Appropriation Act for fiscal year 2010. (The fiscal year 2010 recommended pension contribution of $\$ 82,485,012$ has been reduced to $\$ 3,280,000$ and is included as a receivable contribution for this valuation. This amount may be subject to change per the requirements of the State's fiscal year 2010 spending plan.)

The report does not take into account any changes in U.S. equity prices and bond yields that have occurred after the valuation date. Taking these into account may significantly change the market and actuarial value of assets shown. The effect of these events on any funded ratios shown, and on Retirement System calculations, is not known. Retirement System funding and financial accounting rules generally prohibit reflection of changes in assets and underlying economic conditions that occur after the valuation date.

To the best of our knowledge, this report is complete and accurate. The valuation was performed by, and under the supervision of, independent qualified actuaries who are members of the American Academy of Actuaries with experience in performing valuations for public retirement systems.

The valuation was prepared in accordance with the principles of practice prescribed by the Actuarial Standards Board and generally accepted actuarial procedures and methods. The calculations are based on the current provisions of the System, and on actuarial assumptions that are individually and in the aggregate internally consistent and reasonable based on the actual experience of the System.

# REPORT ON THE ANNUAL <br> VALUATION OF <br> THE STATE POLICE RETIREMENT SYSTEM <br> OF NEW JERSEY <br> PREPARED AS OF JULY 1, 2009 

## SECTION I - SUMMARY OF KEY RESULTS

The State Police Retirement System of New Jersey became effective July 1, 1965 under terms of Chapter 89 of the Laws of 1965. This report, prepared as of July 1, 2009, presents the results of the annual actuarial valuation of the Fund.

For convenience of reference, the principal results of the valuation and a comparison with the preceding year's results are summarized on the following pages.

| Valuation Data |  | July 1, 2009 |  | July 1, 2008 |
| :---: | :---: | :---: | :---: | :---: |
| Number of Members Annual Compensation | \$ | $\begin{array}{r} 3,016 \\ 287,267,502 \end{array}$ | \$ | $\begin{array}{r} 2,947 \\ 281,087,566 \end{array}$ |
| Number of Pensioners and Beneficiaries Total Annual Allowance | \$ | $\begin{array}{r} 2,585 \\ 133,573,198 \end{array}$ | \$ | $\begin{array}{r} 2,520 \\ 124,219,225 \end{array}$ |
| Assets |  |  |  |  |
| Market Value of Assets | \$ | 1,564,180,409* | \$ | 1,976,540,990 |
| Valuation Assets | \$ | 2,067,242,877* | \$ | 2,136,006,509 |
| Contribution Amounts |  |  |  |  |
| Normal Contribution Accrued Liability Contribution | \$ | $\begin{array}{r} 57,663,508 \\ 46,081,773 \\ \hline \end{array}$ | \$ | $\begin{array}{r} 53,727,942 \\ 28,757,070 \\ \hline \end{array}$ |
| Total Pension Contribution | \$ | 103,745,281** | \$ | 82,485, $012{ }^{\text {\# }}$ |
| Non-Contributory Group Insurance Premium | \$ | 1,600,000 | \$ | 1,546,000 |

* Assets include a fiscal year 2010 receivable contribution of $\$ 3,280,000$ instead of the $\$ 82,485,012$ contribution recommended for the July 1, 2008 valuation (potential effect of the Appropriation Act for fiscal year 2010). This amount may be subject to change per the requirements of the State's fiscal year 2010 spending plan.
** The recommended contribution could be subject to reduction in accordance with the provisions of the Appropriation Act for fiscal year 2011.
\# The recommended contribution could be subject to reduction in accordance with the provisions of the Appropriation Act for fiscal year 2010.

The major benefit and contribution provisions of the statute as reflected in the valuation are summarized in Appendix A.

The valuation reflects the final provisions of the Appropriation Act for fiscal year 2009, which allowed the State Treasurer to reduce the State normal and accrued liability contributions for fiscal year 2009 of $\$ 75,889,699$ to $\$ 3,378,000$. (This amount excludes the estimated premium paid to the Non-Contributory Insurance Fund of $\$ 1,789,717$ for the lump sum death benefit during active service.)

The valuation also reflects the potential impact of the Appropriation Act for fiscal year 2010, which allows the State Treasurer to reduce the State normal and accrued liability contributions for fiscal year 2010 of $\$ 82,485,012$ to $\$ 3,280,000$. (This amount excludes the estimated premium paid to the Non-Contributory Insurance Fund of $\$ 1,546,000$ for the lump sum death benefit during active service.) Accordingly, a fiscal year 2010 State appropriation receivable of only $\$ 3,280,000$ was recognized for purposes of this valuation. This amount may be subject to change per the requirements of the State's fiscal year 2010 spending plan.

There were no other changes from the provisions used in the prior valuation.

The valuation was prepared on the basis of the revised demographic assumptions that were determined from the July 1, 2005 - June 30, 2008 Experience Study and approved by the Board of Trustees at the May 2009 Board meeting. The revised actuarial assumptions and methods used for valuing the Fund are summarized in Appendix B.

The combination of the plan provisions, actuarial assumptions and member and beneficiary data is used to generate the overall required level of employer contributions. These contributions are composed of two separate portions, an "accrued liability contribution" and a "normal contribution". The recommended
contribution is developed in Section III F.

The valuation generates a balance sheet which summarizes in some detail the total present and prospective assets and liabilities of the Fund. A summary comparison of the balance sheets as of July 1, 2008 and July 1, 2009 is set forth in the following table. The allocation of assets among the various investment alternatives is shown in graphic form on page 5 .

## SECTION IV - COMMENTS CONCERNING THE VALUATION

The variation in liabilities and contributions reflects the System's actual experience during the year. The System experienced a net actuarial loss during the year that ended June 30, 2009.

The loss is primarily due to an actual return on System assets less than expected. For valuation purposes, an 8.25\% per annum rate of return was assumed. The actual return on the Fund's actuarial value of assets was 2.18\% for the period from July 1, 2008 through June 30, 2009. There was also a liability loss due to experience among active and retired members.

The following shows the development of the actuarial experience, identifies the major experience components, and discusses the impact of the unfunded liability on various funded ratios:

## A. Calculation of Actuarial Experience for the Year Ended June 30, 2009

1. Unfunded Accrued Liability/(Surplus) as of July 1, 2008
\$ 473,158,360
2. Gross Normal Cost as of July 1, 2008

3. Interest on (1) and (2)

4. Actual Members' Contributions Received

18,529,793
5. Employers' Contributions (including receivable)

3,280,000
6. Interest on Contributions 764,354
7. Expected Unfunded Accrued Liability/(Surplus) as of July 1, 2009 $=(1)+(2)+(3)-(4)-(5)-(6)$
\$ $562,464,718$
8. Increase in Unfunded Accrued Liability due to the phase-in provisions of the Appropriation Act for fiscal year 2009

6,086,298*
9. Increase in Unfunded Liability due to Assumption Changes

79,477,254
10. Actual Unfunded Accrued Liability as of July 1, 2009

758,212,691
11. $\quad$ Actuarial (Gain)/Loss $=(10)-(9)-(8)-(7)$
\$ 110,184,421

* The anticipated Appropriation Act for fiscal year 2009 contribution of $\$ 8,743,000$ has been reduced to $\$ 3,378,000$ in accordance with the final provisions of the Appropriation Act for fiscal year 2009.

## B. Components of Actuarial Experience

1. Investment (Gain)/Loss
2. Other (Gain)/Loss, including mortality, cost of living adjustments less than expected, changes in employee data and salary increases greater than expected
3. Total Actuarial (Gain)/Loss

## C. Funded Ratios

As a result of the increase in the unfunded liability, the funded ratio based on the actuarial value of assets (including receivables) decreased by $8.7 \%$ from $81.9 \%$ as of June 30,2008 to $73.2 \%$ as of June 30, 2009. On a market value basis (including receivables), the funded ratio decreased by $20.4 \%$ from $75.8 \%$ to $55.4 \%$. The decrease is greater on a market value basis since the actuarial value smoothes the investment losses over time. Since July 1, 2000, the funded ratio on a market value basis has decreased by $77.4 \%$. This decrease is primarily due to investment losses experienced over the period, State contributions less than the GASB Annual Required Contribution, and the strengthening of actuarial assumptions.

As of June 30, 2009, the market value of assets is less than the actuarial liability attributable to retirees. Furthermore, if the assets contained in the Annuity Savings Fund (ASF) of \$178,485,658 are excluded, the funded ratio of the remaining market value of assets to the actuarial accrued liability for retirees is $84.1 \%$.

As of June 30, 2009, the ratio of market value of assets to the prior year's benefit payment is 12.1. This is a simplistic measure of the number of years that the assets can cover benefit payments, excluding: future increases in those payments, State and member contributions, and investment income. This ratio decreased by $27 \%$ from the previous year's ratio of 16.5 . If ASF assets are excluded, since they represent accumulated contributions from active and inactive members, the ratio is 10.7.

## SECTION V - ACCOUNTING INFORMATION

Statement No. 5 of the Governmental Accounting Standards Board, issued November 1986, established standards of disclosure of pension information by public retirement systems. Statement No. 25 of the Governmental Accounting Standards Board, issued November 1994, established financial reporting standards for defined benefit pension plans and for the notes to the financial statements of defined contribution plans of state and local governmental liabilities and superseded Statement No. 5 effective for periods beginning after June 15, 1996. Statement No. 27, Accounting for Pensions by State and Local Governmental Employers superseded Statement 5 for employers participating in pension plans and is effective for periods beginning after June 15, 1997. Statement No. 50, Accounting for Pensions by State and Local Governmental Employers amends the note disclosure and required supplementary information (RSI) of Statements No. 25 and No. 27 to conform with applicable changes adopted in Statements No. 43 and 45 for Postemployment Benefit Plans other than Pension Plans. Statement No. 50 is intended to improve the transparency of reported information about pensions by State and Local governmental plans and employers. Statement No. 50 is effective for periods beginning after June 15, 2007.

The information required by Statements No. 25, No. 27 and No. 50 is presented in the following tables. These include the development of the Annual Required Contribution (ARC), the development of the Net Pension Obligation (NPO), the Schedule of Funding Progress and the Schedule of Employer Contributions.

## SECTION VI - LEVEL OF FUNDING

Although the value of accrued benefits and the funding ratios shown in the previous section are required for the State's financial statements, it is instructive to also look at these values under an alternative approach. For this purpose, we are presenting liabilities determined on a Financial Accounting Standards Board Statement No. 87 Accumulated Benefit Obligation (ABO) basis. This is the same approach as GASB Statement No. 25 except that no assumption is made as to future salary increases.

As in the case of the Governmental Accounting Standard Board Statement No. 25, the actuarial present value of vested and non-vested accrued benefits was based on an interest rate of $8.25 \%$ for both 2009 and 2008.

# APPENDIX A <br> BRIEF SUMMARY OF THE BENEFIT AND CONTRIBUTION PROVISIONS AS INTERPRETED FOR VALUATION PURPOSES 

## Eligibility for Membership

All members of the former State Police and Benevolent Fund: full-time commissioned officers, noncommissioned officers or troopers of the Division of State Police. Membership is a condition of employment.

## 1. Definitions

Plan Year
Service
Credited Service

Compensation

Final Compensation

Aggregate Contributions

Adjusted Final Compensation

The 12-month period beginning on July 1 and ending on June 30.
Service rendered while a member as described above.
A year is credited for each year of service as an officer or trooper in the State Police. Service with other State Retirement Systems is included in the calculation of the retirement benefit at the rate of $1 \%$ of final compensation for each year of service credit.

Based on contractual salary, including maintenance allowance, received by the member in the last 12 months of credited service preceding retirement, termination or death. Compensation does not include individual salary adjustments granted primarily in anticipation of the retirement or for temporary or extracurricular duties beyond the ordinary work day. (Effective June 30, 1996, Chapter 113, P.L. 1997 provided that the amount of compensation used for employer and member contributions and benefits under the program cannot exceed the compensation limitation of Section 401(a)(17) of the Internal Revenue Code.)

Average compensation received by member in last 12 months of credited service preceding retirement or death. Such term includes the value of the member's maintenance allowance for the same period.

The sum of all amounts deducted from the compensation of a member or contributed by him or on his behalf. For contribution purposes, compensation does not include overtime, bonuses, maintenance or any adjustments before retirement.

The amount of final compensation or final compensation as adjusted, as the case may be, increased by the same percentage increase which is applied in any adjustments of the compensation schedule of active members after the member's death and before the date on which the deceased member of the retirement system would have accrued 25 years of service under an assumption of
continuous service, at which time that amount will become fixed. Adjustments to final compensation or adjusted final compensation shall take effect at the same time as any adjustments in the compensation schedule of active members.

## 2. Benefits

Service Retirement

Vested Termination

Death Benefits

Before Retirement
Mandatory retirement at age 55. Voluntary retirement prior to age 55 with 20 years of credited service. Benefit is an annual retirement allowance equal to the greater of (a), (b), or (c), as follows:
(a) $50 \%$ of final compensation;
(b) For members retiring with 25 or more years of service, $65 \%$ of final compensation, plus $1 \%$ for each year of service in excess of 25 years, to a maximum of $70 \%$ of final compensation.
(c) For members as of August 29, 1985 who would not have 20 years of service by age 55 , benefit as defined in (a) above. For members as of August 29, 1985 who would have 20 years of service but would not have 25 years of service at age 55, benefit as defined in (a) above plus $3 \%$ for each year of service in excess of 20 years.

Termination of service prior to age 55. Benefit for 10 to 20 years of Service - Refund of aggregate contributions, or a deferred life annuity beginning at age 55 equal to $2 \%$ of final compensation for each year of service up to 20 years.

Death of an active member of the plan. Benefit is equal to:
(a) Lump sum payment equal to $3-1 / 2$ times final compensation, plus
(b) Spousal life annuity of $50 \%$ of final compensation payable until spouse's death. If there is no surviving spouse, or upon death or remarriage, a total of $20 \%, 35 \%$ or $50 \%$ of final compensation payable to one, two or three dependent children. If there is no surviving spouse (or dependent children), $25 \%$ or $40 \%$ of final compensation to one or two dependent parents.

Minimum benefit: Aggregate contributions.

After Retirement

Accidental Death

Death of a retired member of the plan. The benefit is equal to:
(a) Lump sum of $50 \%$ of final compensation, plus
(b) Spousal life annuity of $50 \%$ of final compensation payable until spouse's death or remarriage. If there is no surviving spouse, or upon death or remarriage, a total of $20 \%, 35 \%$ or $50 \%$ of final compensation payable to one, two or three dependent children, respectively.

Death of an active member of the plan resulting during performance of duties. Benefit is equal to:
(a) Lump sum payment equal to 3-1/2 times final compensation, plus
(b) Spousal life annuity of $70 \%$ of adjusted final compensation payable until spouse's death. If there is no surviving spouse, or upon death of the surviving spouse, a total of $20 \%, 35 \%$ or $50 \%$ of adjusted final compensation payable to one, two or three dependent children. If there is no surviving spouse or dependent children, $25 \%$ or $40 \%$ of final compensation to one or two dependent parents.

Ordinary Disability Retirement

Mentally or physically incapacitated for the performance of his usual duty and of any other available duty in the Division of State Police and such incapacity is likely to be permanent.
(a) The benefit for members with less than four years of service is a refund of the member's aggregate contributions.
(b) For members with at least four years of service, the benefit is an immediate life annuity equal to $40 \%$ of final compensation plus $1-1 / 2 \%$ of final compensation for years of creditable service in excess of 26-2/3.
(c) For members who are forced to retire with 20 but less than 25 years of service, the benefit is $50 \%$ of the member's final compensation plus $3 \%$ of final compensation for each year of service in excess of 20 years, to a maximum of $65 \%$ of final compensation.

For death following disability retirement, a lump sum equal to 3 $1 / 2$ times final compensation if death occurs prior to age 55 or $1 / 2$ of final compensation after age 55.

Totally and permanently disabled as a direct result of a traumatic event occurring during and as a result of his regular or assigned duties. Benefit is an immediate life annuity equal to $2 / 3$ of final compensation. Upon death after disability retirement, lump sum benefit of 3-1/2 times final compensation if death occurs before 55 and $1 / 2$ times final compensation if death occurs after 55 .

Loan Provision
Eligible if an active member of the State Police Retirement System with at least 3 years of contributory service. If eligible, a member may borrow an amount which is greater than $\$ 50$, but not more than $50 \%$ of aggregate contributions. The loan accrues interest at a rate set by the State Treasurer, which is based on a commercially reasonable rate as required by the Internal Revenue Code. An administrative fee may be charged for the loan.

## APPENDIX B

## OUTLINE OF ACTUARIAL ASSUMPTIONS AND METHODS

VALUATION INTEREST RATE: $8.25 \%$ per annum, compounded annually.
COLA: The COLA is $60 \%$ of the assumed CPI increase. CPI is assumed to increase at $3.0 \%$ per annum, compounded annually.

SALARY INCREASES: Salaries are assumed to increase by $5.45 \%$ per year.
TERMINATION: Withdrawal rates vary by length of service. Illustrative rates are shown below:

MARRIAGE: Husbands are assumed to be 3 years older than wives. Among the active population, $83.3 \%$ of participants are assumed married. No children are assumed. Neither the percentage married nor number of children assumption is individually explicit but are considered as a single combined assumption.

VALUATION METHOD: Projected Unit Credit Method. This method essentially funds the System's benefits accrued to the valuation date. Experience gains and losses are recognized in future accrued liability contributions.

ASSET VALUATION METHOD: A five-year average of market values with write-up. (This method takes
into account appreciation (depreciation) in investments in order to smooth asset values by averaging the excess of the actual over the expected income, on a market value basis, over a five-year period).

DEATHS AFTER RETIREMENT: For healthy inactive members and beneficiaries of deceased members the RP 2000 Combined Healthy Male (set back 3 years) and RP 2000 Combined Healthy Female Mortality tables are used. For disabled members the RP 2000 Combined Healthy Male (set forward 5 years) and RP 2000 Combined Healthy Female Mortality (set forward 5 years) tables are used.
